## DIY Non-Toxic Bathroom Scrub

("Soft Scrub like natural cleaner")

- ◆ 1/2 cup Thieves household cleaner concentrate
- ◆ 2 1/2 – 3 cups baking soda
- ◆ Squeeze bottle

Using a 2 cup measuring cup, measure out 1/2 cup Thieves household cleaner concentrate. Add the baking soda 1/2 cup at a time, whisking it into the liquid. When the consistency you are going for, pour it to a squeeze bottle. A medium size dish soap bottle works great.

Tip - make the cleaner a little bit thicker than you think it should be because you can always add some water to liquify it. To use, just shake the bottle well and squirt on sinks, tubs and anywhere else you need some extra scrubbing action. *Source: myblessedlife.net*

More details and dilution ratios can found on the concentrate bottle. Happy Cleaning!
